

6-Day Certified Course: Winter School in Clinical Epidemiology (3-8 February 2014)

Von *iphcommunication*

Erstellt am 21 Okt 2013 - 14:30

Clinical epidemiology is the application of epidemiologic principles and methods to problems encountered in public health and clinical medicine. It provides important information for clinicians and health policy decision makers in order to identify risk factors for diseases and to determine optimal preventive, diagnostic and therapeutic strategies for individuals and populations. This course covers the key elements and methods of clinical epidemiology and combines theoretical concepts with practical applications using real world case examples.
